The reasons for your curiosity probably include: 1) You don't really know what the hell it is, and 2) You think that Enron (ENE:NYSE - news - commentary) is just another billion dollar company, and therefore has as much chance of making it as do those other bubble-era companies. Well, to those people, I offer my best guess at what the market value of Enron is. In case you don't know what a market value is, it's a number that is derived by considering all of the transactions that a company has ever done. We don't count lease arrangements, since our perspective is the stock market's rather than the company's, and we restrict our consideration to stock transactions. In other words, we analyze what the company would like to do and how much it would have to pay to do it, then we calculate what the market would be willing to pay to accomplish the same transaction. In this regard, we do NOT compare Enron's stock to that of other companies. Instead, we consider how other companies would trade if Enron had the same stock price that it has today. What we are trying to determine is whether Enron has a value in the context of the stock market. We all agree that Enron is worth billions of dollars, but it is not clear that they are worth that much in the context of the present stock market. What we 0cc13bf012
